

Solutions Delivery

LOCAL SOLUTIONS, WORLDWIDE

Project Management

AG Research identifies with the value of formalizing project management to ensure the project achieves our client's objectives. The governance of our PMO solutions will address critical success factors including effective sponsorship, accountability, certified staff, quality leadership and demonstrated value - regardless of each customer's unique requirements and potential solution. AG can plan faster, manage smarter and execute better with its mature PMO.

Solution Partnerships

AG's vast experience developing custom software solutions allows us to participate as a critical partner in developing system solutions for each customer's unique requirements. Our efficient approach to each customer's required solution is cultivated from designing and developing numerous desktop, Extranet and Internet applications and networks for both the private and public sectors, regionally and internationally.

The AG team members are able to discern and expand on details during requirements gathering and, in conjunction with our design and Infrastructure teams, develop comprehensive options for our clients. Our quality assurance team is involved in the entire process to ensure that the deliverables are qualified and verified throughout the project lifecycle.

Web Development

- Positive User Experience
- Enterprise-Strength Security
- Optimized Performance
- Increased User Mobility

Web Development with GIS Enhancements

- Powerful Spatial Interface
- Community and Enterprise Spatial Data for enhanced reporting and presentation
- Business Intelligence through Spatial Analytics
- Integrate ESRI, Bing or Google platforms

Infrastructure Design and Implementation

- High Performance and Secure Hosting

Post Deployment Support

- Select Basic or Enhanced Support to End of Service Life
- 24/7 Help Desk
- As your solutions approaches End of Service Life (EOSL) AG Research will work with you to ensure seamless transition to the next solution or platform upgrade.

Key Features

PMO Benefits

- Professional Management
- Cost-effective Communication with stakeholders and clients
- Project status and executive summary reporting
- Risk Management

Technology

- Flex
- ASP.NET
- PHP
- Drupal
- HTML
- JavaScript
- AJAX
- Esri GIS

Design Parameters

- Multilingual
- N-Tier Design

Sample Themes

- Asset Management
- Case management
- Land Stewardship
- Mineral Rights
- Operational Support

About AG Research

AG Research is an industry leader in providing software applications and delivering IT services to meet diverse business needs. We develop mission critical web applications integrated as necessary with GIS intelligence, IT infrastructure support, hosting and Unified Communications. AG will project manage, design and deliver technically sound and economic solutions to keep you ahead of the curve.
